

## **Inventables™ launches X-Carve Pro™**

*X-Carve Pro is an easy to use large-format CNC machine to grow your business faster*

**Chicago--Oct 6, 2020--** [Inventables](#), the leader in 3D carving software and machines, is excited to announce the launch of the X-Carve Pro, a professional-grade solution that will let you design and build large CNC projects. The X-Carve Pro is designed for entrepreneurs, makers and businesses who want to grow, and who need a machine that's fast, accurate and easy-to-use. Pre-orders open today and will start shipping in April 2021.

**X-Carve Pro is available in two sizes: 4x4 or 4x2, and both models include:**

- Ability to carve full 4' x 8' sheets using the new tiling feature in Easel Pro
- Rigid gantry with 25mm ball screws and linear guides for faster, more accurate carving
- An integrated 2hp air-cooled spindle with pre-programmed variable frequency drive (VFD)
- Dust collection system designed for deeper carving and compatible with most shop vacuums
- 120V plug for standard outlets
- Three-year of access to Easel Pro design software
- Easily imports G-Code, PNG, and DXF files for people that use other software.
- Assembles in less than 4 hours

The Easel Pro software lets users move quickly from an idea to a finished product. It's easy to get started and robust enough to design almost any project. For people already using other software, Easel Pro can quickly import their G-Code, PNG, and DXF files.

"This year, our customers have relied on X-Carve and Easel to do more than 3 million carves," said Zach Kaplan, Inventables CEO. "We've talked to hundreds of customers and built the new X-Carve Pro to help their businesses grow faster. X-Carve Pro can carve 4'x8' sheets, run 25 times faster than our prior model, and is easy for non-technical people to use."

Support teams for hardware and software are US-based and available by phone and email for answers and advice. (M-F 9a-5pm CST) Community forums have posts from thousands of X-Carve and Easel customers to share their experience and ideas.

The X-Carve Pro can be used for batch manufacturing, molds, cabinetry, built-ins, signs, art, large-scale productions and more. For the first 30 days of pre-order, Inventables is offering more than 40% off the standard price, with a starting price of \$5,495 for the 4'x2' model.

**The X-Carve Pro is available for pre-order [here](#) starting October 6th, 2020.**

### **About Inventables**

Inventables is a 3D carving company offering intuitive software and an easy-to-use carving machine, and unique carving materials. Easel and Easel Pro, our design platforms, are the most accessible and user-friendly design software on the market. Paired with our affordable 3D carving machines, X-Carve Pro, X-Carve, makers of all abilities can produce their first project in minutes.

Inventables vision is to ignite a new product revolution by bringing manufacturing capability into the hands of millions of people.
